## Risk and investment objective

### Risk appetite: low / moderate risk

I can accept small, short term losses, but am still concerned about the safety of my investment.

### Capital loss attitude: low / moderate risk

Taking some short term drop in value in an effort to achieve higher long term returns is acceptable. I would prefer the majority of my capital to be held in conservative investments.

### Investment objective:

I am seeking only a high level of income and do not require any prospects of capital growth.

## Average portfolio breakdown

## Investment strategy

Portfolio 1 of 7 aims to provide an income greater than that derived from high street savings accounts by investing predominantly in fixed interest investments. Appropriate if your aim is to retain a reasonable degree of safety and you do not require capital growth from your investments. You accept that the income derived from the investments and the value of your portfolio is not guaranteed and can rise and fall. Typically during periods of falling interest rates and falling inflation the value of fixed interest investments can increase, conversely they may fall if interest rates and inflation rise, which means that over the longer term the 'real value' of your portfolio or 'spending power' may not be maintained and could fall.

The fixed interest exposure will, subject to market and economic conditions, include one or more of: UK Government stocks (gilts), other countries' sovereign debt, corporate bonds from around the world and cash deposits. Gilts are UK government guaranteed (from the risk of default) and are therefore deemed to be less risky than corporate bonds historically. The portfolio may also have a small exposure to global equity markets from time to time. Exposure to alternative assets may include commercial property, infrastructure, commodities (e.g. gold) and funds managed with the aim, although with no guarantee, of delivering positive returns in any market conditions.

## Benchmark past performance

Portfolio 1 is benchmarked against the Markit iBoxx GBP Overall Bond Market Index. The index is designed to mirror the risk and return profile of a diversified portfolio of sterling denominated bonds.

The table below shows total benchmark performance over the past 5 years and the graph shows the best and worst calendar years since 2003.

Discrete 12-month period benchmark performance to last quarter end					
	01/01/2018 to 31/12/2018	01/01/2017 to 31/12/2017	01/01/2016 to 31/12/2016	01/01/2015 to 31/12/2015	01/01/2014 to 31/12/2014
Markit Iboxx GBP Overall Bond Market Index	-0.05%	2.66%	10.58%	0.45%	13.88%

## Risk and investment objective

Emphasis	Capital Security	Wealth Preservation		Wealth Accumulation					
Portfolio	No Thesis Solution	Portfolio 1 of 7	Portfolio 2 of 7	Portfolio 3 of 7	Portfolio 4 of 7	Portfolio 5 of 7	Portfolio 6 of 7	Portfolio 7 of 7	
Risk Appetite	Low risk	Low / moderate risk		Moderate risk			Moderate / high risk	High risk	
	I prefer no risk and want to keep my capital secure, even if it means not keeping up with inflation.	<b>I can accept small, short term losses, but am still concerned about the safety of my investment.</b>		I am seeking a balance between safety and investment growth potential.			I am seeking investment growth and am prepared to accept some losses for potentially higher growth.	I am willing to accept significant risk and potential losses in the pursuit of higher long term investment growth.	
Capital loss attitude	Low risk	Low / moderate risk		Moderate risk			Moderate / High risk	High risk	
	Minimising the risk of a drop in the value of my investment is critical, so I am willing to accept the lower long term returns offered by conservative investments.	<b>Taking some short term drop in value in an effort to achieve higher long term returns is acceptable. I would prefer the majority of my capital to be held in conservative investments.</b>		Achieving a balance between conservative and higher returns is my aim and I accept that there will be a degree of short term value fluctuation.			Seeking higher long term returns is important to me, so I am willing to accept the substantial short term drops in value that may result from investing in more speculative investments.	Maximising long term investment returns is my main objective and I am willing to accept large and sometimes dramatic short term drops in value.	
Investment objective	I am seeking short term security of my capital.	<b>I am seeking only a high level of income and do not require any prospects of capital growth.</b>		I am seeking a reasonable level of income and limited capital growth prospects.	I am primarily seeking income and some capital growth prospects.	I am seeking income together with a reasonable degree of capital growth.	I am primarily seeking capital growth with some requirement for income.	I am primarily seeking capital growth with limited requirement for income.	I am primarily seeking to maximise capital growth over the medium to longer term.
